

Smoke Diagnostics **RX**

• **PRO 2000**

General Purpose Leak Detection

- The smoke detector finds leaks fast
- Economical
- 500 tests per refill
- User refillable
- Saves diagnostic time
- **Pinpoints leaks in:**
Vacuum Lines, Vacuum sub-systems, Fuel systems,
Oil systems, Coolant systems, Differential/Gear box,
Exhaust systems, Brake Boosters, Turbo & Superchargers,
Head Gaskets, Injector O-Rings, Wind/Water Leaks

S - 701 VaporTrail

- Liquid Smoke Solution
- Non-Toxic
- User-Refillable
- Test Capacity: 500
- Drain & Replace
Smoke-Producing Solution
Once a Year

Smoke Diagnostics **RX**

• **PRO 2000**

This diagnostic service uses smoke to aid technicians in identifying air and fluid, and fuel leaks in engines. Leaks can occur in: vacuum lines, fuel systems, oil systems, coolant systems, differential/bear boxes, brake systems, exhaust systems, climate control systems, and cabin wind/water leaks. Due to the cost of labor, the complexity and limited access to many components, the visual identification of leaks with smoke is a powerful diagnostic tool.

How It Works

The smoke machine generates a thick, long lasting smoke from a non-toxic compound. When this smoke is introduced into the system to be tested, it quickly exits wherever there's a leak. All you do is look for the smoke existing the leak or leaks.

Recommended Service Interval

Whenever you need to diagnose vehicle leaks.

Technical Specifications

Power supply: 12 volts DC

Power consumption: 15 Amps.

Supply Pressure: 1.5 PSI (0.10 bar)

Supply volume: 10 LPM

Operating temp. range: 45

0 F to 140 F (72

0 C to 60 C)

Smoke supply line: 10 feet (3m)

Power supply line: 10 feet (3m)

Remote starter cable: 10 feet (3m)

Height: 15 in. (38.1 cm)

Width: 8 in. (20.3 cm)

Length: 15 in. (38.1 cm)

Net weight: 21 lbs. (9.4 kg)

Shipping weight: 21 lbs. (9.4 kg)
